

Bunded Lube Skids & Trailers

The *Cashels* range of **Bunded Lube Skids & Trailers** has been developed for servicing mobile equipment in the construction, mining and various other on-site environments. They are also used by companies who service large installations of compressors and standby generators in data centres, treatment plants, communication towers and generator stations etc.

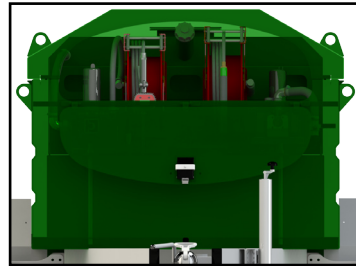

3 Tank Lube Skid

4 Tank Lube Skid

Bunded Lube Trailers are offered in numerous configurations to suit customer requirements. Typical configurations are 2-4 internal lube tanks, complete with 12/24v lube pumps and self retracting hose reels. *Cashels* unique modular design incorporates a separate outer tank with a removable roof to allow access to the internal lube tanks and equipment. The separate outer tank also acts as the bund tank and has 110% capacity of the internal lube tanks.

Key Features:

- Modular construction with secure storage for all equipment.
- Pneumatic or 12/24v DC lube pumps available.
- Outer bund holds in excess of 110% of total volume.
- Air manifold to allow complete control of each pump system (*pneumatic models*).

Model	Length	Width	Max Height	Unladen Weight	Max Gross Weight	Waste Oil Tank Vol.	New Oil Tank Vol.
3 Tank	1506mm (59")	1500mm (59")	1286mm (51")	770kg (1694lbs)	1220kg (2684lbs)	330L (72gal)	2x 160L (2x 35gal)
4 Tank	1490mm (59")	1974mm (78")	1286mm (51")	870kg (1914lbs)	1430kg (3146lbs)	330L (72gal)	3x 110L (3x 24gal)
