

Bunded Shelving Units

The patented **Bunded Shelving Units** from *Cashels* are designed to help companies comply with EU regulations by containing accidental spillages of dangerous goods (*ISO 14001, REACH Directive, etc.*) at the point of storage/display.

Shelving Units with 110% Bund Capacity

Suitable for storage of multiple can/drum sizes up to 5L.

110% bund reservoir for storage of insecticides, pesticides, diesel, petroleum products and cleaning agents.

Shelf Capacity: 330L (72gal)

Each Bunded Shelving Unit is made up of a bunded reservoir, four individual vented shelf trays and supporting frame which also direct any accidental spillage from the shelves down into the bund reservoir. Any spillage that may occur on the shelf trays is extracted through vent holes in the shelves and flows down through the support frame, directly into the reservoir.

Shelving Units with 25% Bund Capacity

Suitable for storage/display of paints, solvents, oils etc. Fitted with a top canopy for signage when used at point of display.

Can facilitate 25L (5gal) drums on the bottom shelf and multiple sizes up to 5L on the upper shelves.

Shelf Capacity: 400L (88gal)

Top Canopy Optional

The bund reservoir is fitted with a removable galvanised grid to allow any waste liquid to be extracted/removed by specialist contractors. The galvanised grid also acts as the bottom shelf tray allowing any accidental spillages to pass through directly into the bund reservoir.

Other sizes available upon request.

Bund Capacity	Length	Width	Height	Net Weight (Unladen)
110% - 350L (77gal)	610mm (161")	1250mm (330")	2060mm (544")	140kg (308lbs)
25% - 110L (24gal)	610mm (161")	1250mm (330")	2060mm (544")	120kg (264lbs)
