

Forklift Tipping Skip

The **Cashels Forklift Tipping Skip** is ideal for handling waste and bulk loads of anything from liquid to paper. Suitable for use in the woodworking, steel fabrication, construction, waste management and environmental sectors.

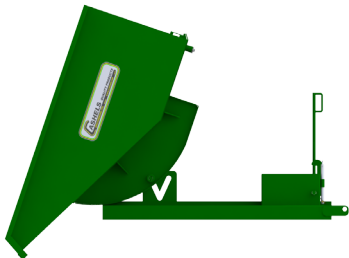

Key Features:

- The main body is constructed from 3mm mild steel.
- Reinforced body rim for maximum rigidity and resistance to distortion.
- Robust tipping frame with definite tip locking device.
- Generous tip out angle to discharge the most stubborn of loads.
- Simple mechanical tipping activation.
- High gloss 2-pack polyurethane paint finish over primer gives long-lasting durability.

Options Available:

- Wheel assemblies for easy movement in confined spaces.
- Skids to allow use by pedestrian pallet trucks.
- Skids to allow side tipping of skip.
- Side extensions to increase capacity.
- Lid with hinged front door.

5' model with Side Extensions

Model	Length	Width	Height	Load Volume	Load Capacity	Net Weight
