

## High-Security Lock-Ups

The *Cashels High-Security Lock-Ups* are designed for the secure storage of high value goods and equipment. They may be used in the storage areas of retail units for secure storage of alcohol, tobacco and high value equipment.

They are most suitable for on-site storage of high value tools and equipment used on construction sites, local authority compounds, treatment plants, airports etc. Designed for ease of handling by forklift or crane and can be securely fixed to a concrete base if required.

### **Key Features:**

- 3mm steel construction throughout, with all seams fully welded.
- Lifting eyes.
- Forklift tunnels.
- High-security door lock with 3-Point lock system - featuring MUL-T-LOCK® hardened hasps and padlock. Keys are only available through a registered key system.
- Innovative hinge design - if the outer hinges are cut, the door still cannot be removed.
- High gloss 2-pack polyurethane paint finish over primer gives long-lasting durability.
- Air vents.

### **Options:**

- Corporate colours.
- Shelves and hangers.
- Larger or double doors available.

Size	Length	Width	Height	Net Weight
6' x 4'	1305mm (51")	1850mm (73")	2185mm (86")	585kg (1287lbs)
8' x 6'	2440mm (96")	1985mm (78")	2100mm (83")	835kg (1837lbs)
