

Mobile Power Washer

The **Cashels Mobile Power Washer** is the ideal product for the industrial contractor or plant hire industry. Designed primarily for high water-pressure applications such as street or signage cleaning, the unit can be adapted for low-pressure applications such as watering flower beds or hanging baskets etc.

Fig. 1

Fig. 2

The **Mobile Power Washer** range features an elevated non-slip platform (Fig. 2) with a collapsible cage (Fig. 1), allowing the user to reach the most inaccessible places safely (*Applicable for twin axle models*). All tanks are Hot-Dip galvanised, fully baffled & pressure tested for durability and reliability.

All products are fitted with independent suspension axles for smooth towing, loaded or unloaded. Braked hubs are fitted all round with a 50mm lockable hitch coupling as standard.

Several pump and engine configurations are available depending on the application. Standard diesel/petrol configurations are available from 5.5hp to 11hp. High-grade hot-wash units can also be fitted if required.

Other Key Features:

- Elevated platform with collapsible safety cage (*twin axle models only*).
- Non-slip access steps to platform.
- EU Whole Vehicle Type Approved chassis.
- 15m of high-pressure hose on a self-retracting reel, complete with washing lance.
- High load rated tyres - 165/13 8ply.

Optional Extras:

- Jetter nozzle & reel for drain cleaning.
- Stainless steel self-retracting hose reels.
- Telescopic washing lances.
- High/Low pressure outlets.
- Rear spray bar for dust suppression or chemical application

Model	Length	Width	Height	Weight (Unladen)	Weight (Laden)	Axle/ Suspension
