

## Ducks Foot Double Bale Handler

The **Cashels Ducks Foot Double Bale Handler** has been developed to cater for the transport of two 4 foot wrapped bales without damage to film. The rugged design is based on Cashels' time-proven Ducks Foot bale handling concept.

The Ducks Foot paddles which rotate on stone fork tines can handle sagged/misshapen bales without causing damage to bale film. The Ducks Foot concept also allows the user to stand bales on their end at the storage area. This is achieved by simply dropping the bale handler to the ground, driving forward approximately  $\frac{3}{4}$  of the length of the bale and then raising the lift arms. As the lift arms are raised the paddles rotate and the bales will stand on their ends without any damage to bale film.

The Ducks Foot paddles can be removed, allowing the unit to be used as a double spike for handling straw, haylage, hay and mature silage bales.

Length (mm)	Width (mm)	Height (mm)	Linkage	Load Capacity	Net Weight (kg)	Tractor (HP)
1345	2470	795	CAT 2	2 Bales/1500kg	230	100+
