

Ducks Foot Double Bale Handler

The Ducks Foot design has also been developed into a product that can handle, transport and tip two bales, up to 5ft in diameter, simultaneously.

This concept also allows the user to stand round bales on their end at the storage area. This is achieved by simply dropping the bale handler to the ground (Fig.1), driving forward approximately $\frac{3}{4}$ of the bale length (Fig.2) and then raising the lift arms (Fig.3). As the lift arms are raised, the paddles rotate and the bale will stand on its end without any damage to the bale film.

Key Features:

- Designed for handling sagged or misshapen wrapped bales.
- Capable of handling bales up to 1500mm (5') in diameter.
- CAT 2 stone fork tines for spiking round and square bales.
- Hot-dip galvanised paddles for long life.
- Rotating paddles to allow bales to be tipped on their end.
- 3-point Linkage as standard, various linkage options available.
- Available in a 4ft or 5ft model.
